Adrian Cabello

Senior Full-Stack Product Developer · Angular & Node.js

Necochea, Argentina | +54 2262 497993 | c.adriancabello@gmail.com | adriancabello.dev | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Developer with 9+ years in frontend engineering and additional backend experience delivering web and mobile products. Build Angular interfaces, RESTful services, and production workflows with Angular, TypeScript, Node.js/Express, NestJS, Prisma, Spring Boot, Go, and PostgreSQL, and run my own NestJS API in production for client websites. Work across frontend and backend teams in remote international teams.

CORE SKILLS

Full-Stack Engineering: End-to-end feature ownership, technical design, RESTful API design, API integration, production delivery, incident resolution, code review, mentoring
Frontend: Angular 2 through the latest version, TypeScript, JavaScript, HTML5, CSS3, RxJS, Signals, NgRx/Redux, Ionic, responsive UI, accessibility, performance optimization
Backend & Cloud: Node.js, Express, NestJS, Prisma, Spring Boot (Java), Go, REST APIs, JWT auth, webhooks, PostgreSQL, MySQL, MongoDB, AWS, Google Cloud Storage, Azure DevOps, Docker, CI/CD
Testing: Jasmine, Karma, Jest, Cypress
AI & Automation: LLM product interfaces, document Q&A, AI chat, MCP servers, agent workflows, Claude Code, Codex, Cursor, ChatGPT

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | CLARA Analytics

Remote, Argentina | Jun 2025 - Sep 2026

- Built and maintained production features with Angular and TypeScript for a data-intensive analytics platform.
- Worked with the backend team on Spring Boot services, developing new functionality and creating new REST endpoints.
- Integrated data-rich and AI-enabled workflows with product, design, and QA across the full delivery lifecycle.

Senior Frontend Developer | Scanntech

Remote, Argentina | May 2024 - Jan 2025

- Built an Ionic and Angular ordering app for Coca-Cola and Unilever field sales teams: visit planning, customer catalogs, orders and returns, offline sync, delivery tracking, and geolocated routes.
- Developed and integrated Spring Boot REST services supporting the ordering and analytics features.
- Migrated a large enterprise application from AngularJS to Angular 19 and delivered new analytics features using Signals, deferred loading, hydration, and reusable components.

Senior Frontend Developer / Frontend Lead | Halo Media - Mercer

Remote, Argentina | Jun 2022 - Apr 2024

- Led frontend architecture and implementation for Mercer RFP, an Angular 17 document Q&A product, from initial setup through file uploads and AI-response review workflows.
- Developed NestJS backend services for two years, building new features and REST endpoints alongside the Angular applications.
- Built Mercer Mind, a real-time AI chat experience using Angular, TypeScript, RxJS, NestJS, secure authentication, and contextual responses.
- Created investment and corporate web products from scratch and maintained 80%+ unit test coverage across complex applications.
- Maintained Azure DevOps CI/CD pipelines for building, testing, and deploying the Angular applications.

EARLIER EXPERIENCE

Senior Frontend Developer | Cognizant Softvision - EY

Remote | Mar 2021 - Jun 2022

- Developed and optimized Angular 11 features for the EY Global Tax Platform, a large-scale enterprise tax operations product.
- Built reusable components, Redux state flows, and REST integrations with 80%+ unit test coverage, resolving performance issues across a complex distributed application.

Frontend Developer | ProKarma - Symplr

Remote | Jun 2019 - Mar 2021

- Delivered Angular 9 features for a healthcare governance, risk, and compliance platform.
- Built administrative forms, reusable UI components, and Redux state flows in an organization of 100+ engineers, designers, and product managers.

Frontend Developer | Grupo Assa

Tandil, Argentina | Dec 2016 - Jun 2019

- Built finance and retail web platforms using Angular 4-7, TypeScript, Angular Material, Redux, and REST APIs.
- Worked as part of the backend team on a Node.js and Express backend, connecting multiple external APIs and creating new endpoints for authentication, role-based access, real-time chat, and pagination.

INDEPENDENT PROJECTS

Founder & Full-Stack Developer | Rakium - Independent Studio

Built outside working hours | May 2025 - Present

- Built and run in production a NestJS, Prisma, and PostgreSQL API that powers the Rakium portfolio, several client websites, and a leads and sales CRM.
- Implemented JWT auth with role-based guards, global validation, centralized database error handling, and Swagger docs.
- Built image uploads with Sharp optimization behind a pluggable storage layer, and migrated media from Backblaze to Google Cloud Storage with a dry-run, flag-gated cutover.
- Integrated Instagram messaging webhooks with HMAC signature verification; shipped with multi-stage Docker builds on Dokploy.

Founder & Tech Lead | EventLoop - Independent Side Project

Built outside working hours | Dec 2023 - Present

- Lead product, architecture, and releases for an event operations platform, building Angular 22 workflows for POS, ticketing, inventory, catalogs, and multi-location operations.
- Implemented role-based access, receipt OCR imports, and real-time inventory sync, contributing Go backend services and PostgreSQL data models.

EDUCATION

University Technician in Computer Applications Development - UNICEN, Tandil, Argentina | 2015-2018
Software Engineering coursework - UNICEN | 2012-2015
Professional and Personal Computer Technician - Technical School No. 3, Necochea | 2011

CERTIFICATIONS, TRAINING & LANGUAGES

Angular Intermediate and Angular Basic - HackerRank | JavaScript Intermediate and Basic - HackerRank | Unit Testing in Angular - Pluralsight | Scrum Fundamentals - SCRUMstudy | NgRx/Redux, Node.js, MEAN Stack, and Advanced Angular - Udemy
Languages: Spanish: Native | English: Advanced professional proficiency (C1)
