Adrian Cabello

Senior Angular Developer · Frontend Lead

Necochea, Argentina | +54 2262 497993 | c.adriancabello@gmail.com | adriancabello.dev | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Senior Angular developer and frontend lead with 9+ years of experience building enterprise SaaS, analytics dashboards, mobile workflows, and AI products. Lead Angular architecture and migrations, build scalable component systems, and improve performance, accessibility, and test coverage. Work across product, design, backend, and QA in remote international teams.

CORE SKILLS

Angular: Angular 2 through the latest version, TypeScript, RxJS, Signals, NgRx/Redux, standalone components, deferred loading, hydration, reactive forms, routing, guards, interceptors
Frontend: Ionic, JavaScript, HTML5, CSS3, Sass, Tailwind CSS, Angular Material, responsive UI, accessibility, performance optimization, design systems
Quality & Delivery: Jasmine, Karma, Jest, Cypress, CI/CD (Azure DevOps), Git, code review, mentoring, Agile/Scrum
Integration & Cloud: REST APIs, real-time interfaces, Node.js, NestJS, PostgreSQL, AWS
AI-assisted Engineering: Claude Code, Codex, Cursor, MCP servers, agent workflows, and Jira automation

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | CLARA Analytics

Remote, Argentina | Jun 2025 - Sep 2026

- Delivered Angular and TypeScript interfaces for a data-intensive analytics platform, integrating backend APIs into production workflows.
- Worked with product, design, backend, and QA to deliver AI-enabled features and improve frontend maintainability and usability.

Senior Frontend Developer | Scanntech

Remote, Argentina | May 2024 - Jan 2025

- Built an Ionic and Angular mobile ordering app for field sales and distribution teams supporting Coca-Cola and Unilever programs.
- Shipped visit planning, customer-specific catalogs, order and return capture, offline sync, delivery tracking, and geolocated seller routes with completion and exception monitoring.
- Migrated a large enterprise application from AngularJS to Angular 19 and delivered new analytics features using Signals, deferred loading, hydration, reusable components, and REST integrations.

Senior Frontend Developer / Frontend Lead | Halo Media - Mercer

Remote, Argentina | Jun 2022 - Apr 2024

- Led frontend architecture and implementation for Mercer RFP, an Angular 17 document Q&A product, from initial setup through file uploads and AI-response review workflows.
- Built Mercer Mind, a real-time AI chat experience using Angular, TypeScript, RxJS, secure authentication, and contextual responses.
- Created investment and corporate web products from scratch and maintained 80%+ unit test coverage across complex applications.
- Maintained Azure DevOps CI/CD pipelines for building, testing, and deploying the Angular applications.

EARLIER EXPERIENCE

Senior Frontend Developer | Cognizant Softvision - EY

Remote | Mar 2021 - Jun 2022

- Developed and optimized Angular 11 features for the EY Global Tax Platform, a large-scale enterprise tax operations product.
- Built reusable components, Redux state flows, and REST integrations with 80%+ unit test coverage, resolving performance issues across a complex distributed application.

Frontend Developer | ProKarma - Symplr

Remote | Jun 2019 - Mar 2021

- Delivered Angular 9 features for a healthcare governance, risk, and compliance platform.
- Built administrative forms, reusable UI components, and Redux state flows in an organization of 100+ engineers, designers, and product managers.

Frontend Developer | Grupo Assa

Tandil, Argentina | Dec 2016 - Jun 2019

- Built finance and retail web platforms using Angular 4-7, TypeScript, Angular Material, Redux, and REST APIs.
- Implemented authentication, role-based access, dynamic JSON forms, real-time chat, routing, pagination, and analytics.
- Maintained strong unit test coverage while delivering responsive, production-ready interfaces.

INDEPENDENT PROJECTS

Founder & Full-Stack Developer | Rakium - Independent Studio

Built outside working hours | May 2025 - Present

- Build client websites with Angular, SSR, and Tailwind CSS, backed by my own NestJS, Prisma, and PostgreSQL API in production.
- Run the content, media, and CRM back office end to end, from data models and uploads to deployment.

Founder & Tech Lead | EventLoop - Independent Side Project

Built outside working hours | Dec 2023 - Present

- Lead product, architecture, and releases for an event operations platform, building Angular 22 workflows for POS, ticketing, inventory, catalogs, and multi-location operations.
- Implemented role-based access, receipt OCR imports, and real-time inventory sync, contributing Go backend services and PostgreSQL data models.

EDUCATION

University Technician in Computer Applications Development - UNICEN, Tandil, Argentina | 2015-2018
Software Engineering coursework - UNICEN | 2012-2015
Professional and Personal Computer Technician - Technical School No. 3, Necochea | 2011

CERTIFICATIONS, TRAINING & LANGUAGES

Angular Intermediate and Angular Basic - HackerRank | JavaScript Intermediate and Basic - HackerRank | Unit Testing in Angular - Pluralsight | Scrum Fundamentals - SCRUMstudy | NgRx/Redux, Node.js, MEAN Stack, and Advanced Angular - Udemy
Languages: Spanish: Native | English: Advanced professional proficiency (C1)
