Adrian Cabello

Senior Frontend Developer · Angular Tech Lead

Necochea, Argentina | +54 2262 497993 | c.adriancabello@gmail.com | adriancabello.dev | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Senior frontend developer and Angular tech lead with 9+ years of experience building enterprise SaaS, analytics dashboards, AI products, and operational platforms. Deep experience in Angular, Ionic, TypeScript, RxJS, Signals, frontend architecture, performance, accessibility, and testing. Lead teams, build products from scratch, and connect technical decisions to product outcomes.

CORE SKILLS

Frontend: Angular 2 through the latest version, Ionic, TypeScript, JavaScript, RxJS, Signals, NgRx/Redux, HTML5, CSS3, Sass, Tailwind CSS, Angular Material, responsive UI, accessibility, performance optimization
Engineering: Frontend architecture, design systems, REST APIs, real-time interfaces, Jasmine, Karma, Jest, Cypress, CI/CD, Git, Agile/Scrum, code review, mentoring
AI & Automation: LLM product interfaces, document Q&A, AI chat, MCP servers, agent workflows, Claude, ChatGPT, and Jira-integrated automation

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | CLARA Analytics

Remote, Argentina | Jun 2025 - Sep 2026

- Built and maintained production frontend features with Angular and TypeScript in a cross-functional product environment.
- Integrated data-rich and AI-enabled workflows while improving maintainability, usability, and frontend architecture.
- Collaborated with product, backend, design, and QA teams across the full delivery lifecycle.

Founder & Tech Lead | EventLoop - Independent Side Project

Built outside working hours | Dec 2023 - Present

- Lead product strategy, UX, frontend architecture, releases, and continuous iteration for an event operations platform.
- Built Angular 22 and TypeScript workflows for POS, ticketing, inventory, product catalogs, and multi-location operations.
- Implemented role-based access, receipt OCR imports, recipe-linked stock, and real-time inventory synchronization.
- Contribute to Go backend services and PostgreSQL data models while guiding technical decisions across the product.

Senior Frontend Developer | Scanntech

Remote, Argentina | May 2024 - Jan 2025

- Built an Ionic and Angular mobile ordering app for field sales and distribution teams supporting Coca-Cola and Unilever programs.
- Shipped visit planning, customer-specific catalogs, order and return capture, offline sync, delivery tracking, and geolocated seller routes with completion and exception monitoring.
- Migrated a large enterprise application from AngularJS to Angular 19 and delivered new analytics features using Signals, deferred loading, hydration, reusable components, and REST integrations.

Adrian Cabello

Professional Experience - Continued

Senior Frontend Developer / Frontend Lead | Halo Media - Mercer

Remote, Argentina | Jun 2022 - Apr 2024

- Led frontend development for Mercer RFP, an Angular 17 document Q&A product with AI-generated responses and file processing.
- Built Mercer Mind, a real-time AI chat experience using Angular, TypeScript, RxJS, secure authentication, and contextual responses.
- Created investment and corporate web products from scratch and maintained 80%+ unit test coverage across complex applications.

EARLIER EXPERIENCE

Senior Frontend Developer | Cognizant Softvision - EY

Remote | Mar 2021 - Jun 2022

- Developed and optimized Angular 11 features for the EY Global Tax Platform, a large-scale enterprise tax operations product.
- Built reusable components, Redux state flows, REST integrations, and interactive workflows with 80%+ unit test coverage.
- Resolved performance and maintainability issues across a complex distributed application.

Frontend Developer | ProKarma - Symplr

Remote | Jun 2019 - Mar 2021

- Delivered Angular 9 features for a healthcare governance, risk, and compliance platform.
- Built administrative forms, reusable UI components, Redux state flows, and responsive experiences.
- Collaborated in a cross-functional organization of 100+ engineers, designers, and product managers.

Frontend Developer | Grupo Assa

Tandil, Argentina | Dec 2016 - Jun 2019

- Built finance and retail web platforms using Angular 4-7, TypeScript, Angular Material, Redux, and REST APIs.
- Implemented authentication, role-based access, dynamic JSON forms, real-time chat, routing, pagination, and analytics.
- Maintained strong unit test coverage while delivering responsive, production-ready interfaces.

SELECTED IMPACT

- 9+ years delivering Angular applications across enterprise, analytics, fintech, healthcare, AI, and event operations.
- Led frontend products from architecture through production release and ongoing iteration.
- Maintained 80%+ unit test coverage on multiple global products.
- Built AI-powered document Q&A, real-time chat, and AI-assisted engineering workflows.
- Comfortable working independently in remote, international, English-speaking teams.

EDUCATION

University Technician in Computer Applications Development - UNICEN, Tandil, Argentina | 2015-2018
Software Engineering coursework - UNICEN | 2012-2015
Professional and Personal Computer Technician - Technical School No. 3, Necochea | 2011

CERTIFICATIONS & TRAINING

Angular Intermediate and Angular Basic - HackerRank | JavaScript Intermediate and Basic - HackerRank | Unit Testing in Angular - Pluralsight | Scrum Fundamentals - SCRUMstudy | NgRx/Redux, Node.js, MEAN Stack, and Advanced Angular - Udemy
